

MITEL

Headsets | Plantronics

Maximum convenience, comfort and performance in a choice of designs

“Headsets from Plantronics” – the world’s leading provider of headsets, complement Mitel’s® family of IP and digital telephones and consoles.

Specially designed for Mitel, these headsets plug directly into the dedicated interface jack provided on selected Mitel IP and Superset™ digital telephones. The jack is designed with unique circuitry for headset amplification, so there is no need for a headset amplifier box – volume control is via the telephone volume control keys. Designed for convenience, these headsets are equipped with a feature control switch that allows the user to mute the microphone, answer the call and hang-up. They also have a quick disconnect plug that allows the user to move away from the telephone while on a call without removing the headset. The user can resume the call by reconnecting the headset. Mitel offers a variety of headset models:

- Monaural over-the-ear
- Monaural over-the-head with voice tube
- Binaural over-the-head with voice tube
- Binaural over-the-head with noise canceling microphone

Unamplified headsets with feature-control switch

Plantronics produces a range of headsets, in the styles illustrated, for use with Mitel Superset 4000 series, Mitel 5200 IP series telephones and consoles. These come with the Mitel Feature-Control Switch.

- **Microphone Mute:** Press and hold the switch
- **Call Hang-up:** Momentarily push and then release the switch during the call to hang-up the call
- **Call Answering:** Momentarily push and then release the switch to pick up a call

Binaural over-the-head with voice tube (P101)

Ideal for anyone working in a noisy environment who really needs to concentrate on calls as it provides sound in both ears. The single cable design gives maximum comfort too. It also lets you adjust the tone of the caller's voice.

Monaural over-the-head with noise canceling mike (P51)*

Light and comfortable with excellent sound quality, this headset has a single earpiece, allowing users to confer with colleagues when making and taking calls. It's fully adjustable for comfort with a soft ear cushion that buffers background noise and is ideal for anyone working in an open concept environment.

Binaural over-the-head with noise-canceling mike (P101N)

The ultimate headset with all the advantages of being able to adjust the caller's tone of voice, plus a noise canceling microphone and sound in both ears.

Monaural over-the-ear with voice tube (P81)

Weighing a mere 12 grams, this tiny but highly efficient over-the-ear product sets new standards in compact headset design, stability and comfort. It's available with the standard voice tube.

it's about **YOU**

How to select the right headset for your environment

The chart below will help you determine which Plantronics headsets will best match your working conditions and needs.

Applications	Binaural over-the-head with voice tube (P101)	Binaural over-the-head with noise-canceling mike (P101N)	Monaural over-the-head with noise canceling mike (P51)*	Monaural over-the-ear with voice tube (P81)	Benefits
